## Regents Examination in Algebra I

Cylinder-head-sector (CHS) is an early method for giving addresses to each physical block of data on a hard disk drive.. It is a 3D-coordinate system made out of a vertical coordinate head, a horizontal (or radial) coordinate cylinder, and an angular coordinate sector. Head selects a circular surface: a platter in the disk (and one of its two sides).

The Penrose tiles are a pair of shapes that tile the plane only aperiodically (when the markings are constrained to match at borders). These two tiles, illustrated above, are called the "kite" and "dart," respectively. In strict Penrose tiling, the tiles must be placed in such a way that the colored markings agree;

in particular, the two tiles may not be combined into a rhombus (Hurd).

Welcome. The Computing + Mathematical Sciences (CMS) Department is nestled in the heart of Pasadena  
on the beautiful Caltech campus. CMS is home to outstanding students and researchers who share a passion  
for science and engineering, as well as a drive to investigate the most challenging, fundamental problems in  
computation and information.
