The Design of Sites: Patterns for Creating Winning Web

A website is a collection of related web pages, including multimedia content, typically identified with a common domain name, and published on at least one web server. Notable examples are wikipedia.org, google.com, and amazon.com.. A website may be accessible via a public Internet Protocol (IP) network, such as the Internet, or a private local area network (LAN), by referencing a uniform ...

Magic Items and Detect Magic. When detect magic identifies a magic itemâ€™s school of magic, this information refers to the school of the spell placed within the potion, scroll, or wand, or the prerequisite given for the item. The description of each item provides its aura strength and the school to which it belongs. If more than one spell is given as a prerequisite, use the highest-level spell.
