Logic Models are a popular tool that can be used to help conceptualize your change effort. It does this by inviting the author(s) to articulate their understanding of the current situation, the changes they hope to bring about through their program effort, with and/or for whom, the activities planned to contribute toward this change, the resources needed to put into the effort, assumptions they ...

Data mining is the process of discovering patterns in large data sets involving methods at the intersection of machine learning, statistics, and database systems. Data mining is an interdisciplinary subfield of computer

science with an overall goal to extract information (with intelligent methods) from a data set and transform the information into a comprehensible structure for further use.
