

decision support for forest pdf

A decision support system (DSS) is an information system that supports business or organizational decision-making activities. DSSs serve the management, operations and planning levels of an organization (usually mid and higher management) and help people make decisions about problems that may be rapidly changing and not easily specified in advance—i.e. unstructured and semi-structured ...

Decision support system - Wikipedia

Random forests or random decision forests are an ensemble learning method for classification, regression and other tasks that operates by constructing a multitude of decision trees at training time and outputting the class that is the mode of the classes (classification) or mean prediction (regression) of the individual trees. Random decision forests correct for decision trees' habit of ...

America's Wetlands. Wetlands are areas where water covers soil all or part of the time. Wetlands are

important because they protect and improve water quality, provide fish and wildlife habitats, store floodwaters and maintain surface water flow during dry periods.

Wetlands Protection and Restoration | US EPA

Policies. Wildland fire recognizes no ownership or jurisdictional boundaries on the landscape; nor do the complex issues of fire management. As a result, perhaps nowhere is the practice of interagency and interdepartmental cooperation so prevalent and effective as in the nation's wildland fire community.
