- [Voiceover] Hi, I'm Gary Yeoman, and welcome to Designing a SharePoint Taxonomy. In this course, we'll look at how to decide between SharePoint components to build a long-lasting, maintainable document and data management system. I'll start by explaining how your documents can be organized, and some of the primary concerns when deciding how to arrange them.

Computer software, or simply software, is a collection of data or computer instructions that tell the computer how to work. This is in contrast to physical hardware, from which the system is built and actually performs the work. In computer science and software engineering, computer software is all information processed by computer systems, programs and data.

In computer science, separation of concerns (SoC) is a design principle for separating a computer program into distinct sections, such that each section addresses a separate concern. A concern is a set of information that affects the code of a computer program. A concern can be as general as the details of the hardware the code is being optimized for, or as specific as the name of a class to ...
