Developmental disability is a diverse group of chronic conditions that are due to mental or physical impairments that arise before adulthood. Developmental disabilities cause individuals living with them many difficulties in certain areas of life, especially in "language, mobility, learning, self-help, and independent living". Developmental disabilities can be detected early on and persist ...

Formative assessment, including diagnostic testing, is a range of formal and informal assessment procedures conducted by teachers during the learning process in order to modify teaching and learning activities to improve student attainment. It typically involves qualitative feedback (rather than scores) for both student and teacher that focuses on the details of content and performance.

This article discusses the theory and practice of so-called participatory governance. It explains that participatory governance is a variant or subset of governance theory which puts emphasis on democratic engagement, in particular through deliberative practices. Participatory governance seeks to deepen citizen participation in the governmental process by examining the assumptions and ...
