Data flow diagrams and system flow diagrams are much easier to put together when you collaborate. Lucidchart is an online data flow diagram tool, so you can easily invite all your colleagues to the same document, and then set permissions to let them comment or edit.

Data Flow Diagram Software | Lucidchart

Data Flow Diagram (DFD) provides a visual representation of the flow of information (i.e. data) within a system. By creating a Data Flow Diagram, you can tell the information provided by and delivered to someone who takes part in system processes, the information needed in order to complete the processes and the information needed to be stored and accessed.

Data Flow Diagram with Examples - Customer Service System

Het Data Flow Diagram (DFD), is een grafische representatie van de gegevensstroom, de dataflow, door een informatiesysteem. Het is een veel gebruikte techniek binnen de gestructureerde analyse. Andere benaming voor een Data flow diagram zijn gegevenstroomschema en systeemstroomschema.

A data model (or datamodel) is an abstract model that organizes elements of data and standardizes how they relate to one another and to properties of the real world entities. For instance, a data model may specify that the data element representing a car be composed of a number of other elements which, in turn, represent the color and size of the car and define its owner.
