

diffusion processes and stochastic pdf

In mathematics – specifically, in stochastic analysis – the infinitesimal generator of a stochastic process is a partial differential operator that encodes a great deal of information about the process. The generator is used in evolution equations such as the Kolmogorov backward equation (which describes the evolution of statistics of the process); its L^2 Hermitian adjoint is used in ...

Infinitesimal generator (stochastic processes) - Wikipedia

Diffusion is the net movement of molecules from a region of higher concentration to a region of lower concentration. Diffusion is driven by a gradient in chemical potential of the diffusing species. A gradient is the change in the value of a quantity e.g. concentration, pressure, or temperature with the change in another variable, usually distance. A change in concentration over a distance is ...

On Tuesday 4 December, 05:00 - 21:00 GMT, we will be making some site updates. You will still be able to search, browse and read our articles, but you won't be able to register, edit your account, purchase content, or activate tokens or eprints during that period.

Stochastics: Vol 91, No 1 - Taylor & Francis

Introduction. Molecular motors use chemical energy and transform it into work, orchestrating myriad processes inside a cell. They are examples of active matter, i.e. entities that stay out of thermodynamic equilibrium by consuming energy in the environment (or internally stored) in order to move [1]. There is a growing interest in creating synthetic analogues, not only to reveal and understand ...

Neurofeedback does not specifically target any disorder. Instead Neurofeedback changes timing and activation patterns in the brain. The goal is to slowly guide your brain back into normal, healthy ranges and reconnect neural pathways that have been disconnected.
