Classical mechanics describes the motion of macroscopic objects, from projectiles to parts of machinery, and astronomical objects, such as spacecraft, planets, stars and galaxies.. If the present state of an object is known it is possible to predict by the laws of classical mechanics how it will move in the future (determinism) and how it has moved in the past (reversibility).

Story. Doing Data Science Exercises Without Data Cleaning and Coding. So as a data scientists/data journalist/information designer, who is about to teach university courses, I asked is it possible to teach and introductory level class that does not require first learning a lot about data cleaning and coding?

Table 1: The four levels/modes of processing. Figures 3, 4, and 5 show how within the processing model, cognition depends upon context. The effectiveness of the contribution of processing activities at each of these levels / modes, depends on the cognitive requirements posed by the specific context.
