Grade One “ Lesson Plans - Alberta Health Services

Nutrition is the science that interprets the interaction of nutrients and other substances in food in relation to maintenance, growth, reproduction, health and disease of an organism. It includes food intake, absorption, assimilation, biosynthesis, catabolism, and excretion. The diet of an organism is what it eats, which is largely determined by the availability and palatability of foods.

Myths and Truths About Nutrition. Myth: Heart disease in America is caused by consumption of cholesterol and saturated fat from animal products. Truth: During the period of rapid increase in heart disease (1920-1960), American consumption of animal fats declined but consumption of hydrogenated and industrially processed vegetable fats increased dramatically (USDA-HNIS).
