Emerging technologies are technologies whose development, practical applications, or both are still largely unrealized, such that they are figuratively emerging into prominence from a background of nonexistence or obscurity. These technologies are generally new but also include older technologies that are still controversial and relatively undeveloped in potential, such as preimplantation ...

Robert, though your organization focuses on developing countries, I believe that the title "Global" trends is accurate. While preparing an E-learning in Africa paper, it was interesting to see the common challenges of effective ICT adoption are also in play here in North America, and the change in pedagogy has been slow.
