Philosophies Adaptation: environment over culture. The sixties was a breakthrough decade for environmental anthropology, with functionalism and system theories prevalent throughout. The rudiments of the system theories can be seen in Marcel Mauss' Seasonal Variation of Eskimo, echoed later in Julian Steward's work. Although later, system theories were later harshly criticized for narrowly ...

Environmental history is the study of human interaction with the natural world over time, emphasising the active role nature plays in influencing human affairs and vice versa.. Environmental history emerged in the United States out of the environmental movement of the 1960s and 1970s, and much of its impetus still stems from present-day global environmental concerns.
