Evaluation Briefs No. 3b January 2009 Writing Smart Objectives

SMART is a mnemonic/acronym, giving criteria to guide in the setting of objectives, for example in project management, employee-performance management and personal development. The letters S and M generally mean specific and measurable. Possibly the most common version has the remaining letters referring to achievable, relevant and time-bound. However, the term's inventor had a slightly different ...

A smart city is an urban area that uses different types of electronic data collection sensors to supply information which is used to manage assets and resources efficiently. This includes data collected from citizens, devices, and assets that is processed and analyzed to monitor and manage traffic and transportation systems, power plants, water supply networks, waste management, law ...

Smart city - Wikipedia

A self-evaluation is a great opportunity for employees to honestly and objectively consider and document their performance. Note: To prepare for a transition to the new Workday system later in 2018, some changes have been made to the performance templates in an effort to simplify the form and focus attention on performance goals for the coming year.

Climate-smart agriculture (CSA) goes beyond new technologies and practices like drought resistant varieties or precision farming. To achieve the multiple objectives of productivity and food security, enhanced farmer resilience and reduced greenhouse gas emissions, CSA must adopt various systems perspectives. These include landscapes and ecosystems, as well as value chains.
