Software engineering is een deelgebied van de informatica dat zich bezighoudt met alle aspecten van het bouwen van complexe maar betrouwbare software tot informatiesystemen.Het is een vakgebied dat zich bezighoudt met methodes om een vraag of probleem in de werkelijkheid om te zetten naar een computerprogramma.. Iemand die bedreven is in software engineering is een software engineer (soms ook ...

Software engineering - Wikipedia

A software system is a system on intercommunicating components based on software forming part of a computer system (a combination of hardware and software). It "consists of a number of separate programs, configuration files, which are used to set up these programs, system documentation, which describes the structure of the system, and user documentation, which explains how to use the system".

CS-102 Logical Organization of Computers . Aims There are two views of computer architecture. The traditional view, dating back to the IBM System/360 from the early 1960's, is that the architecture of a computer is the programmer-visible view of the machine, while its implementation is the province of the hardware designer.

Software engineering
Software engineering is the application of engineering to the development of software. It involves the design, development, testing, and maintenance of software systems. The field is interdisciplinary, drawing on computer science, electrical engineering, and systems engineering. Software engineers are responsible for creating the code that runs on computers and other devices. They also work on the design and architecture of software systems, ensuring that they are efficient, reliable, and easy to use. Software engineering is a rapidly growing field, with new technologies and applications being developed all the time.

Étymologie. Le terme anglais « (en) software » a été utilisé dès 1953 pour distinguer la partie modifiable de l'ordinateur, par opposition au « (en) hardware » qui est la partie matérielle permanente. Il apparut dans la littérature pendant les années 1960 [1]. En français, le mot logiciel est formé en 1969 à partir des mots logique et matériel comme traduction par la ...
