December 2015"Many laboratories have yet to reap the benefits of autoverification even though there is clear evidence of its benefits. During a recent internal study at Labsco, we discovered that more than 70 percent of our customers have not yet implemented AV. Of the customers who did perform AV, the highest percentage seen was about 60 percent (primarily in hematology and coagulation).

Up to 10% of invasive cancers are related to radiation exposure, including both ionizing radiation and non-ionizing radiation. Additionally, the vast majority of non-invasive cancers are non-melanoma skin cancers caused by non-ionizing ultraviolet radiation. Ultraviolet's position on the electromagnetic spectrum is on the boundary between ionizing and non-ionizing radiation.

## **Radiation-induced cancer - Wikipedia**

The stratospheric ozone layer is Earth's "sunscreen" protecting living things from too much ultraviolet radiation from the sun. The emission of ozone depleting substances has been damaging the ozone layer.

## **Ozone Layer Protection | US EPA**

If multiple signal sources of the same frequency are present, or multiple paths exist between a radar

and target, then the total signal at a location is the sum (superposition principle). The result is interference: constructive interference occurs if the waves
